

**DO NOW:**

**Read each situation below and be ready to discuss your response with the person sitting next to you.**

1. Gary says that the **additive inverse** of a number is always negative. Do you agree or disagree with this statement?  
*Be ready to justify your response.*
  
2. Betsy says that the **multiplicative inverse** of -12 is  $\frac{1}{12}$ . Do you agree or disagree with this statement? *Be ready to justify your response.*
