

Name: _____

Electricity

circuit	glass	insulators	conductors
electric current	rubber	series	parallel
resistor	copper	battery	silver

Chose the best word(s) from the word box to complete each sentence.

1. The flow of electricity is an electric current.
2. A path that an electric current follows is a circuit.
3. A battery supplies energy to move electricity through a circuit.
4. Insulators are materials that electrical current cannot pass through.
5. Conductors are materials that electrical current can easily pass through.
6. Silver and Copper are examples of materials that are conductors.
7. Rubber and glass are examples of materials that are insulators.
8. A resistor is a material that cuts down the flow of current, but does not stop it.
9. A series circuit is a circuit in which electrical current can follow only one path.
10. A parallel circuit is a circuit in which electrical current has more than one path to follow.
