

DO NOW:

(A) Evaluate.

$$2.5 + \left(-\frac{7}{4}\right) \div 1\frac{3}{4}$$

(B) Evaluate when $x = -4$, $y = -\frac{1}{2}$, and $z = 2.5$.

$$\frac{x^2 - y}{z}$$

(C) The Sweet Tooth candy shop recorded its income and expenses for three days as follows:

\$653.85 -\$282.01 \$501 -\$653.85 \$282.01 -\$303.05

What is the candy shop's net income (income – expenses) for the three days?
