

Name: _____

Date: 4-2-19
(NOTES)

Aim: I can explain how temperature affects the phase of matter.

To Now:

Notes:

Changes of State

Melting- solid phase to liquid phase

Freezing- liquid phase to solid phase

Sublimation- solid phase to gas phase

Condensation- gas phase to liquid phase

Vaporization- (Evaporation) liquid phase to gas phase

Deposition- gas phase to solid phase

Phase changes of matter

Thermal Expansion- Objects will tend to Expand when heated up and Contract when cooled down.
